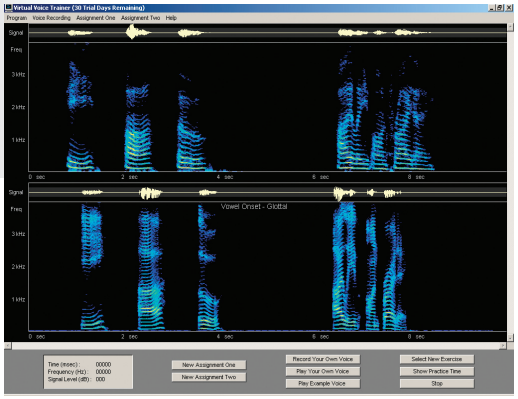
Virtual Voice Trainer™

Makes therapy and home practice more productive by providing real-time audio and visual feedback.

Find a New Way! from Vocal Innovations™



Biofeedback is a powerful tool for improving performance during the training or rehabilitation of a variety of motor skills

Real-time Display & Playback are available throughout the learning process to enhance motivation and refine production.

On-Target & Off-Target pre-recorded voices provide concrete models for goal setting.

User-Friendly Interface a hallmark of all Vocal Innovations products

Time Tracker measures client compliance

Simple Screens make anyone feel like a technology pro so the focus of practice is *practice* and not "how does this program work?"

Display Options include pitch only trace, intensity only trace, spectrogram, power spectrum

Customized Options allow clinicians to create, record, save, and e-mail their own exercises

Home Practice Version available for clients at reasonable prices — ask about special offers with purchase of **Voice Evaluation Suite**
